Tinotenda Mutenda

Junior Web Developer

Johannesburg, South Africa | just.tino@icloud.com | github.com/tin0-0

PROFILE

Junior developer studying IT Programming at Unicollege, looking for a junior front-end or full-stack role. I build with Next.js, Tailwind and Supabase, and I have delivered live websites for real clients.

SKILLS

Next.js, React, Tailwind CSS, Supabase (Auth and Row Level Security), HTML, CSS, JavaScript, Git and GitHub, deploying on Vercel

PROJECTS

- **Medi-Clinic** — A multi-role clinic app for patients, doctors, pharmacy and admin, built with Next.js, Supabase and Tailwind. I built the login and most of the styling. Live site
- **Canteen Connect** — A team project for the Unicollege canteen: student ordering with a live order tracker and a staff order queue. I worked on the frontend.
- **Impact International Learning** — A live website for a training and supervision business, on the client's own domain. Live site
- **BK Autospares** — A website for an auto parts business with a searchable price list, photo gallery and contact form. Live site

EXPERIENCE

Freelance Web Developer

- Built and deployed websites for small businesses.
- Set up domains and hosting on Vercel and handed a finished site over to the client's own account.

EDUCATION

IT Programming, Unicollege, Johannesburg
